

4-Channel Transmitter DFMRTI10

RTI10 universal 4-channel transmitter is designed to take any dry contacts as inputs from button/switch/relay devices, and transmit them to ACTIVOR receivers.

Features:

- Suitable for all types of dry contacts NO or NC
- Long RF range up to 100m in open area
- 4 channel inputs and outputs - each has LED indication
- Compact design to fit in limited space
- Compatible with all Activor receivers, such as DFMRRR01, DFMRRR500 and DFMRRR1000
